

THINK THE DANGER FROM ASBESTOS IS A THING OF THE PAST?

It isn't. It might still be in any **building** built before 2000.

We're calling time on asbestos. We're asking the government for a **central register** so that we know where all the asbestos is and in what condition it is.

We're also asking them to set a timeframe for the safe removal of asbestos, prioritising settings such as **schools** and **hospitals**.

The clock is ticking.
